Continuation of Disposition of Claims: Claims subject to restriction and/or election requirement are 1-5,7-15,17-26,29-31,33-35,37-39,41-45,47-55 and 59-67.

## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Claims 1-5, 7, 17-23, 25, 26, 29, 30, 33, 34, 37, 38, 41-44, 47-52, and 64-65 drawn to a three dimensional non-linear ion trap having means for generating a dipole field, means for generating a multipole field, a rotationally symmetrical ring electrode, two cap electrodes, a cone electrode and a disc electrode.

Species II: Claims 8-15, 31, 35, 39, 45, 53-55 and 67 drawn to a two dimensional ion trap with means for generating a two dimensional quadrupole field and means for superimposing an independent two-dimensional variable multipole electrostatic field.

Species III: Claims 59-60 drawn to a three dimensional ion trap in a vacuum chamber where pressure in the chamber is 1 to 10 Pascal.

Species IV: Claim 61 drawn to a three-dimensional non-linear ion trap comprising cap electrodes, each of said cap electrodes being divided into a predetermined number of component electrodes having predetermined shape, a DC circuitry constructed and arranged for applying an DC voltage to a pair of said component electrodes of said cap electrodes to generate an independent electrically variable electrostatic octopole field in said ion trap.

Species V: Claims 62-63 directed towards an ion trap switchable between three dimensional quadrupole ion trap mode and two dimensional linear ion trap

Art Unit: 2881

mode where the trap comprises a ring electrode divided into an even number of isolated component electrodes.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
